NATIONAL ARCHIVES HISTORICAL DISPATCH #1948

MEMORANDUM FOR THE CHIEF OF STRATEGIC SERVICES

SUBJECT: Evaluation of High-Resolution Multi-Tier Document Compression

1. Archival reproduction requires preserving authentic scan artifacts while ensuring sub-millisecond GPU upload and rendering times.

2. The scanned image stream contains uncompressed RGB samples alongside vector stamps and historical hand-written accession stamps.

3. Recent testing confirms that StarPDF GPU image sampling achieves >100x speedups compared to traditional CPU memory rasterization pipelines.
